Installing Makaton for InPrint

Overview

Makaton signs and symbols are a form of **Wordlist**. A **Wordlist** is a file that links words with graphics. If you type 'cat' in **Symbol Mode** while using InPrint 3, the loaded **Wordlist** will automatically display the symbol associated with that word. You can choose to enable or disable different **Wordlists** in InPrint 3, depending on how you wish to use the program.
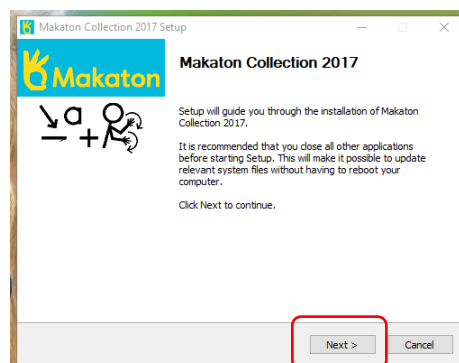

OR

Installing Makaton

Makaton needs to be installed on the same machine(s) as the InPrint software.

1. Insert the USB and double-click on Makaton Collection 2017

- Makaton Collection 2017.exe
- Makaton Collection Licence_Jan17.pdf
- Makaton Collection Licence_Jan17.txt
- Uninstall Guide Makaton Collection 2017....

2. Click **Next** when prompted

3. Ensure that you have ticked the relevant box(es) - in this case InPrint 3, and click **Next** until it starts installation.
**4.** You will get a **Wait** message.

Loading the Makaton to Wordlists

To load **Makaton Wordlists** for use, you need to have a new blank document open in InPrint.
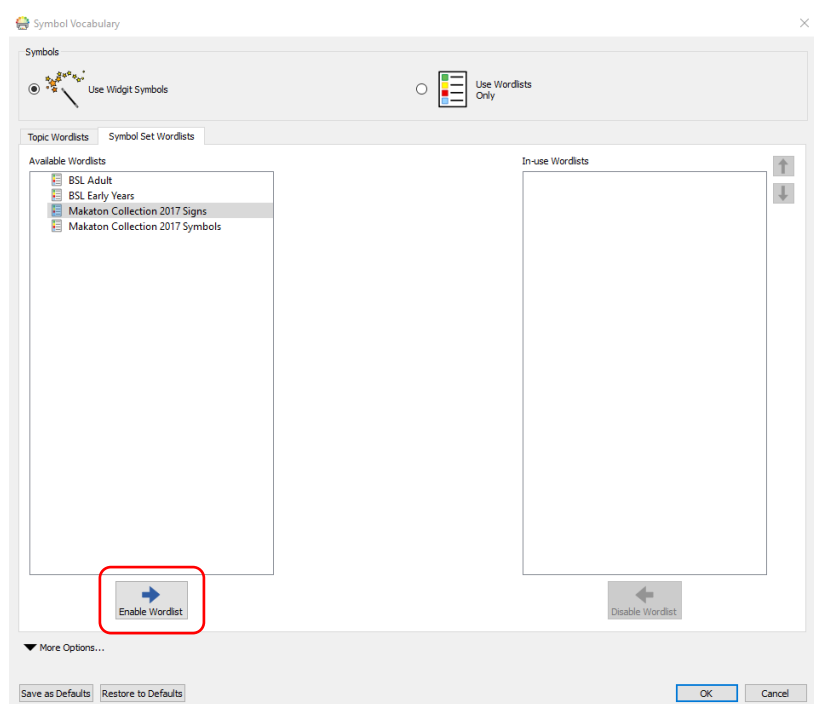

1. Select the **Symbols** tab, and then the **Symbol Settings** button.
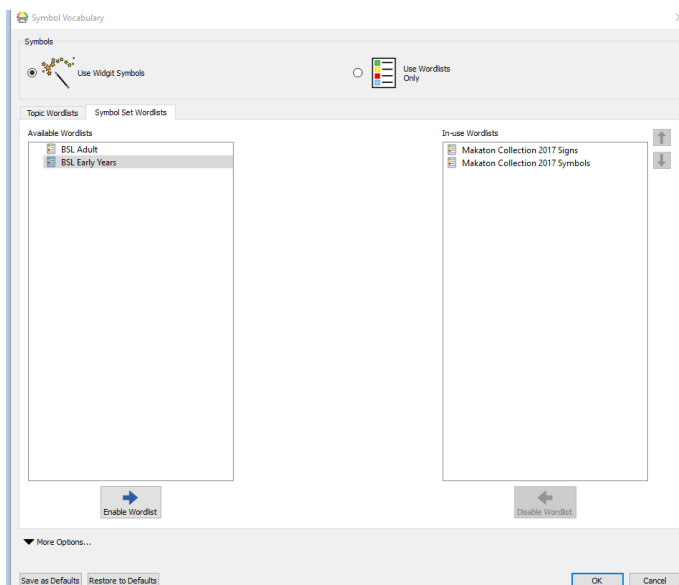

2. You will see a pop-up screen.

3. Click the **Symbol Set Wordlists** tab. You should see **Makaton Collection 2017 Signs** and **Makaton Collection 2017 Symbols**. If you have bought any others, they should be displayed here also. Click to select a **Wordlist**, then click the **Enable Wordlist** button.
4. Once any/all lists you wish to use are displayed in the right-hand box, click **OK**

NOTE: If you want to permanently have a wordlist in use click the Save as Defaults button.

5. You may see this warning. Simply click **OK**.

Now when you type into a document, there will be Makaton options alongside the Widgit Symbols:
